On-Page factors are the aspects of a given web page that influence search engine rankings. In order to get valuable results that allow your business to grow from organic online mediums, you have to get these areas of on-page optimization done correctly. We've checked your website for High, Medium and Low Priority On-Page Optimization problems. Fixing these issues will considerably improve SEO performance.

Note that the elements with a green tick don't necessarily mean that these on-page elements are fully optimized. It signifies that these elements were detected on the website but could be optimized further to suit search engine algorithms and rank the website better.

Google Pages Indexed

36 Pages Found In Google

These are the number of pages of your website, which are present in Google's search engine database since it was created. Ideally you should keep adding great content to your website, and each page can bring in new search engine visitors.

Apart from Google, which covers 92% of search share, we also optimize your website in Bing and Yahoo, which cover 3% and 2% of search share respectively. Overall, we have your website covered for almost 97% of the online searches.

SSL Certificate Details

Secure website

Great, your website is SSL secured (HTTPS).

- ✓ Your Website's URL's redirect to HTTPS pages.
- ✓ Your SSL certificate expires in next 244 days.
- ✓ The certificate issuer is Go Daddy Secure Certificate Authority - G2
- ✓ The certificate is valid from Apr 14, 2020 to Apr 14, 2021.
- ✓ The certificate uses RSA-SHA256 algorithm.

SSL provides an extra security layer while logging in to your website. Google has confirmed that an HTTPS (vs HTTP) website would receive an extra boost in their ranking.

Apart from this, another important reason to use HTTPS is all modern browsers browser will show a 'NOT SECURE' warning when users enter text in a form on a HTTP (non secure) page. And if they get this warning message on your website, you're likely to lose out on potential leads which will affect your business.

What is PageSpeed Insights?

PageSpeed Insights (PSI) by Google is one of the most used page speed measurement tools. It reports on the performance of your website on both mobile and desktop devices, and provides suggestions on how that page may be improved.

Why Is It Important?

Website load time is critical. It's so important that Google has made it an actual ranking factor. PageSpeed Insights (PSI) can help you pinpoint key technical issues occurring on your site that may have a negative impact on its speed and performance. Resolving these issues will help to improve your site performance in the eyes of Google and thus boost your rankings.

How To Interpret PageSpeed Insights Score?

Green - Your website score is good with no significant issues found. Nice job!

Orange - Your website score is average but you still need to solve those errors to improve your website score further.

Red - Your website is slow. Fixing the issues should have a measurable impact on your website performance.

What is Local Visibility?

If you are a local business, you want people to find you when they search for something. When your business is visible, you will be the go-to resource when they look for answers to a problem. So, visibility is simply your overall presence in the local ecosystem. No matter how great your website is, if people can't find you locally, it's all for naught.

Why Does It Matter?

There are over 10 billion Google searches performed every single month. That's a lot. It's important to be as far up on the Google search results as possible. A perfect 100% visibility score would mean you are visible to users on all the top local directories out there. This also helps with improving your rankings in Google. Thus more traffic and leads to your business.
